Purpose: The purpose of the data collection is to identify which districts provide dual enrollment opportunities and to gather identifying information about these programs. Dual enrollment refers to opportunities for high school students to be enrolled in high school and post-secondary courses at the same time. There are essentially three categories of such opportunities:

- College credit only – students receive college credit for courses taken from a post-secondary institution but do not receive high school credit. Students may or may not be taking these courses during the school day.
- Dual credit – students receive both college credit and high school credit for courses taken from a postsecondary institution. Students may or may not be taking these courses during the school day.
- Concurrent enrollment – the district offers these courses during the school day and they are taught by district high school faculty who have been approved by the post-secondary institution to teach these college level courses. Students receive both high school and college credit for the course completed.
